

DS 200

A contact free flux gate based current measurement sensor – 200A_{rms}

DS 200 is member of the small housing sensor family. The family includes 200A and 600A versions.

- 200A rms - 300A peak
- Turns ratio 1:500
- Aperture size is 27.6mm
- Operating temperature from -40 to +85 deg celcius
- Available with LEMO, BNC and DSUB output connection

The sensor is a flux gate based sensor and does have an intrinsic measurement error of less than 0.5 ppm of full scale and is build in a ruggedized aluminum housing for optimal shielding against external noise and optimal cooling.
